

METHOD, SYSTEM AND PROGRAM PRODUCT FOR MANAGING
BUILDING OPTIONS

ABSTRACT OF THE DISCLOSURE

Building options are managed. An indication of at least one available option for constructing a building or modifying an existing building is obtained by a first user. The at least one available option is made electronically accessible to a second user. The second user electronically provides an indication of at least one choice from among the at least one available option, and the indication of at least one choice is provided to the first user.
